

Northgate Energy is a Local Omani Company established in the Sultanate of Oman in August 2011.

The Company is built to provide engineering services to both the Oman Government and Petroleum Development of Oman and to many Petroleum Concessional Owners in the core Oil & Gas area of Pipe Line Maintenance, Civil, Mechanical and Electrical works including Equipment lease and Logistic Management.

Northgate Energy can offer a variety of services associated with the Oil and Gas industry, through various agency agreements and sub-contract agreements with several International companies.

We are sure to achieve our business objectives through sustainable improvements in technology and driving down cost in the contract services delivery. Our approach and methodology is fully aligned with any International competitors with no compromise on Safety, Quality and integrity.

We can deliver highly effective, efficient and transparent business improvement due to our local knowledge. It will be an added advantage in any integrated service contracts. Our combination is not of a simple commercial entity of convenience, but one that mutually supportive and meeting challenges.

Northgate Energy is the right team with the right people with the right culture to meet this unique challenge. Northgate Energy will bring an in-depth of experience in this journey with a proven world class result.

Northgate Energy will deliver year on year measurable performance and value improvement with our clients.
